

CO₂ emissions in tons

**WE WANT A GREAT
SCHOOL!**

**WE HAVE TO
CHANGE
SOMETHING!**

**BUT HOW CAN
WE DO THAT?
WITH THESE
EASY STEPS:**

- Switch off the light when you leave the room
- Recycle your paper products
- Walk or take bike to go to school
- Or use carpools to bring many students to school together
- Or use public transportation

- Organize classroom clean up days
- Separation of waste
- Use glass bottles instead of plastic bottles
- Examine your school's water use

What the school is already doing...

Our school offers an environment club.

There you can learn a lot about your environment.

Moreover, we have a school garden and we are an “eco-school“ since 2012.

Each year 80% of 100 million empty printer cartridges are disposed of in the garbage.

But they can be used again by refilling them.

Therefore, there is a group named “Sammeldrachen“.

The group gives your school a box which can be filled with old phones and empty printer cartridges.

When the box is full they pick up the box and give the school books, food and toys.

You can find the box at our school in the secretary's office.

Why should we change...

- Environmental protection creates new jobs.
- Environmental protection promotes research.
- Environmental protection prevents natural disasters.
- Environmental protection saves lives - of humans and animals.

YES WE CAN!

Make

ASG

great again!

*If you laugh at the world,
she laughs back*
